

Accreditation, CME, MOC, and Disclosure Information

ACG Annual Meeting, October 20-25, 2023

Accreditation/CME/MOC

The American College of Gastroenterology is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit information for CME and for MOC is listed within individual course descriptions in the mobile app, on the Conference Platform, and in the printed program book distributed to attendees in Vancouver.

Procedure to Claim CME: Attendees of the ACG 2023 educational activities may claim CME by completing a course evaluation via the ACG website at evals.gi.org/am/2023. Instructions on claiming CME and MOC are available in the mobile app, on the Conference Platform, and on the inside back cover of the printed program book distributed to attendees in Vancouver.

Disclosure Information

The American College of Gastroenterology (ACG) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. ACG, as an ACCME accredited provider, ensures balance, independence, objectivity, and scientific rigor in all of its directly and jointly provided education activities. All who are in a position to control the content of an accredited activity are required to disclose to ACG all financial relationships in any amount occurring in the past 24 months with ineligible companies. Ineligible companies (formerly, "commercial interests") are those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. The ACCME Standards for Integrity and Independence require that ACG disqualify individuals who refuse to provide this information from involvement in the planning and implementation of accredited continuing education. For all those in control of CME content, ACG will identify and mitigate relevant financial relationships prior to the individuals assuming their roles and will disclose all relevant financial relationships to the learners prior to the beginning of an education activity.

Oversight of all educational programming content is conducted by the ACG Board of Trustees through a review and approval process.

To mitigate relevant financial relationships for speakers, the educational content was peer reviewed by a member of the ACG Educational Affairs Peer Review Subcommittee. Subcommittee members have each indicated they have no relevant financial relationships.

All individuals involved in planning or presenting this activity have disclosed to ACG their financial relationships (or have indicated that none exist). All of the relevant financial relationships listed for these individuals (on the following pages) have been mitigated.

ACG 2023 EDUCATIONAL PROGRAMS

Annual Scientific Meeting

Paper & Poster Author Industry Disclosures

PAPER/POSTER INDUSTRY INVOLVEMENT DISCLOSURES

The American College of Gastroenterology (ACG) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. ACG, as an ACCME accredited provider, ensures balance, independence, objectivity, and scientific rigor in all of its directly and jointly provided education activities. All who are in a position to control the content of an accredited activity are required to disclose to ACG all financial relationships in any amount occurring in the past 24 months with ineligible companies. Ineligible companies (formerly, “commercial interests”) are those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. The ACCME Standards for Integrity and Independence require that ACG disqualify individuals who refuse to provide this information from involvement in the planning and implementation of accredited continuing education. For all those in control of CME content, ACG will identify and mitigate relevant financial relationships prior to the individuals assuming their roles and will disclose all relevant financial relationships to the learners prior to the beginning of an education activity.

INFORMATION ON THE GENESIS OF STUDY CONCEPTS AND DESIGN: AUTHOR RESPONSIBILITY

The American College of Gastroenterology has supplemented the current conflict of interest disclosure with an additional series of questions completed by the authors of abstracts indicating whether they have been actively and personally involved in developing the study’s concept and design and in collecting the data. This assures that the participants are aware of authors who are reporting data actually collected and developed by others, e.g., a pharmaceutical company or other commercial entity.

An abstract not referenced below indicates that the authors reported no industry involvement took place in any aspect or phase of the research.

The research in the following abstracts was reported to be industry initiated:
