ADCES Annual Conference *Distinguished Poster Showcase*

The Distinguished Poster Showcase gives a select group of Education and Research Poster authors the opportunity to highlight their work during a designated showcase time in the poster session area on the exhibit floor. Selected posters will also be recognized with special ribbons in the Poster Hall.

The Education and Research Subcommittee Chairs select Distinguished Posters based on their relevance and contributions to diabetes care and education, with consideration given to practical, sustainable approaches, collaboration across the diabetes care team, the contributions of diabetes care and education specialists (DCESs), and strategies that improve access to care and health outcomes for diverse populations.

Interested in being considered for the Distinguished Poster Showcase?

To be eligible, you must first submit your Education or Research Poster abstract by April 21, 2027. Abstracts will be reviewed for acceptance into the general Education or Research Poster program.

Only after your abstract has been accepted will you receive instructions and access to upload your completed poster PDF and audio recording. Both must be **uploaded by May 5, 2027, to be considered for the Distinguished Poster Showcase.**

Please plan accordingly, as you will not have access to the upload portal until your abstract has been accepted into the general poster program.
