# Using the Audience Response System (ARS):
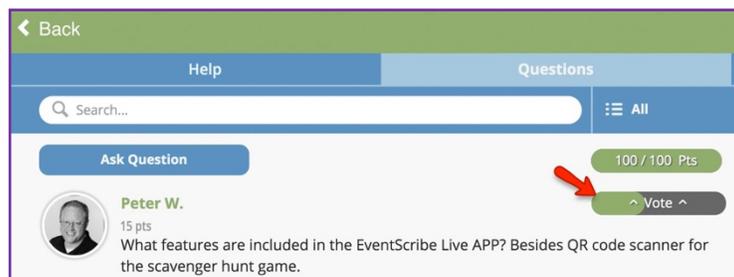

Logging in:

- Certain features or functionality on the website may only be accessible to users with an account. To log in, you can click in the upper right corner of the main screen, and enter your credentials.

What is ARS?

- The Audience Response System may consist of any/all of the following:

  a) **Discussion Board**- Attendees can interact and converse with each other during a presentation. If you wish to add emojis on a PC, hold down the (;) key while pressing the Windows Key ⊞. If you are using a MAC, hold down Ctrl + Space Bar + ⌘

  b) **Question Area**- You can pose questions to the audience or the presenter using the *"Ask Question"* button. Type in your question, and hit Enter. Other attendees will be able to see your question, and vote-up questions that they find most relevant. As your question accrues points, it will move to the top of the list.

  c) **Need Help?** - Just click the HELP tab to the far left for some quick-tips if you are unsure of a particular function within the ARS window.
