CONGRESS LEADERSHIP

Meet the leaders who are helping to inform and develop the content for this year's meeting. They are creating a forum for exchange for cancer care stakeholders to explore and share practical approaches to issues that are relevant to them today such as:

- + Ensuring enterprise viability in an environment of healthcare industry consolidation and vertical integration;
- + Combatting resource constraints especially relating to infusion services;
- + The hunt for the value in value-based cancer care: how do we define value and reconcile the disparate stakeholder perspectives, providers, payors and patients;
- + Leveraging data to inform clinical and business decision-making; and more.
