

# IBM is tackling the world's greatest challenges.

As the architect of two of the top three most powerful supercomputers in the world, Summit and Sierra, our systems are put to work in miraculous ways.

## We're harnessing the potential of AI and data to:

- Combat cancer
- Identify energy efficient building materials
- Accelerate our understanding of disease with the help of AI

## You too can harness that potential and more!

Solutions that simplify hybrid cloud strategies, storage platforms that optimize performance, scalability and flexibility that can help you conquer your own data and AI challenges!

Join us at SC20 to learn how you can unlock the potential today.
