

Proud to call Atlanta Home

Who We Are

The Emory University Department of Emergency Medicine provides care to over 300,000 patients annually in 5 metro Atlanta Emergency Departments including the region's primary Level 1 trauma center at Grady Memorial Hospital. We recruit and train a diverse group of fellows and residents to be excellent emergency physicians while caring for Atlanta and Georgia's citizens in their time of greatest need.

The Department provides expertise in:

- Clinical Emergency Medicine
- Observation and Clinical Decision Units
- Disaster Management
- Emergency Health System Management
- Injury Prevention
- Translational Neurosciences Research
- Pre-hospital Care & Emergency Medical Services
- Public Health and Advocacy
- Virtual Care and Digital Transformation
- Wellness, Diversity, Equity, and Inclusion

Vision for the Future

**Health DesignED, Telemedicine
and Clinical Decision Units**

"The Emory EM team has a vanguard role in telemedicine and health design's nascent arenas. Our vision is to revolutionize how patients interface with the healthcare system ensuring holistic care anytime and anywhere. Simultaneously, we're sculpting the future by preparing budding clinicians to assimilate tech-centric care and novel care paradigms. Emory EM is at the forefront championing technology's potency in enhancing accessibility and ensuring care delivery remains seamless—whether you're at home, work, or on the move."

- Dr. David Wright, Chair
