- There is no cost to use them, attendees download the Mamava App, and it will direct them through signing up

- Once signed up, with location services on, the app will automatically show them the closest locations. If they are in the GWCC, then it will immediately show our two locations. See picture of what it looks like in the app.

- When they are near the Mamava, it will give them a code to unlock it. Note the app gives a specific location.

- Both of our current Pods offer an outlet, lock, and privacy. The B Building location offers space for a stroller. Note there are no refrigerators.

- Pods lock from the inside and when someone is inside the app notifies you.
